E-mail Setup Guide

May 8

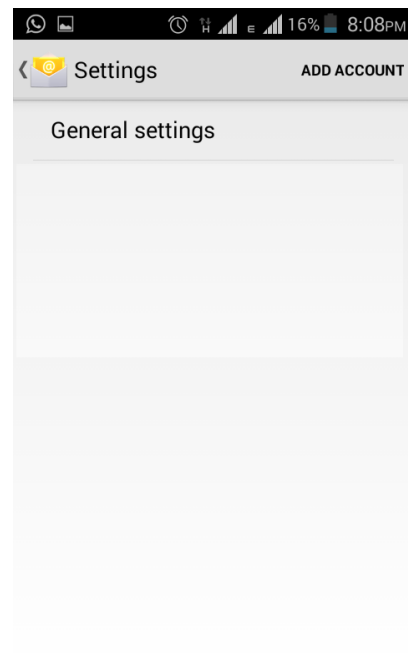

2017

The following guide displays how to setup your e-mail account using a Mobile Device.

For Mobile

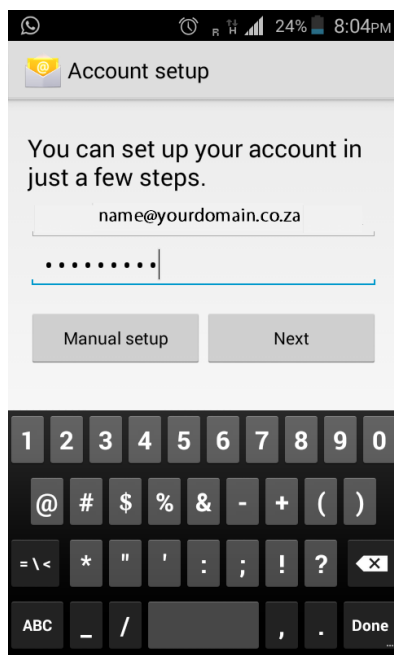

1. On your mobile phone, locate the E-mail App and select it.

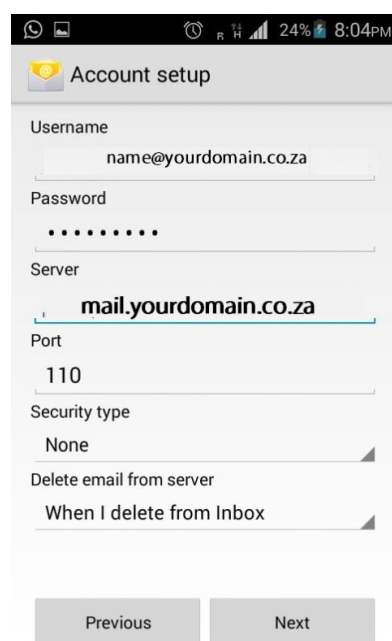

2. Select 'Add Account'

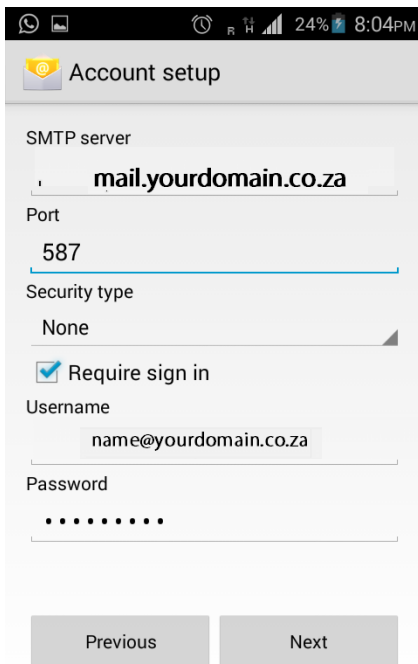

NOTE: Some mobile phones may request you to select the type of e-mail account you wish to setup, you should choose POP3

3. Set Username (e-mail address & Password, then Manual Setup

4. Incoming Server Settings
 - a. Server – mail.yourdomain.co.za
 - b. Port – 110, then 'Next'

Account setup

SMTP server
mail.yourdomain.co.za

Port
587

Security type
None

Require sign in

Username
name@yourdomain.co.za

Password
.....

Previous Next

5. Outgoing Server Settings

- a. Server – mail.yourdomain.co.za
- b. Port – 587, then 'Next'

You are now successfully connected to your business e-mail and should begin to receive e-mails. If there may be errors during setup, login to your [Strat Hostess account](#) and [contact support](#) .

NOTE: Some mobile phones screens may vary, the settings you need to remember are the following:

- Username: The e-mail address you are setting up
- Incoming & Outgoing mail server: mail.yourdomain.co.za
- Incoming port: 110
- Outgoing port: 587
